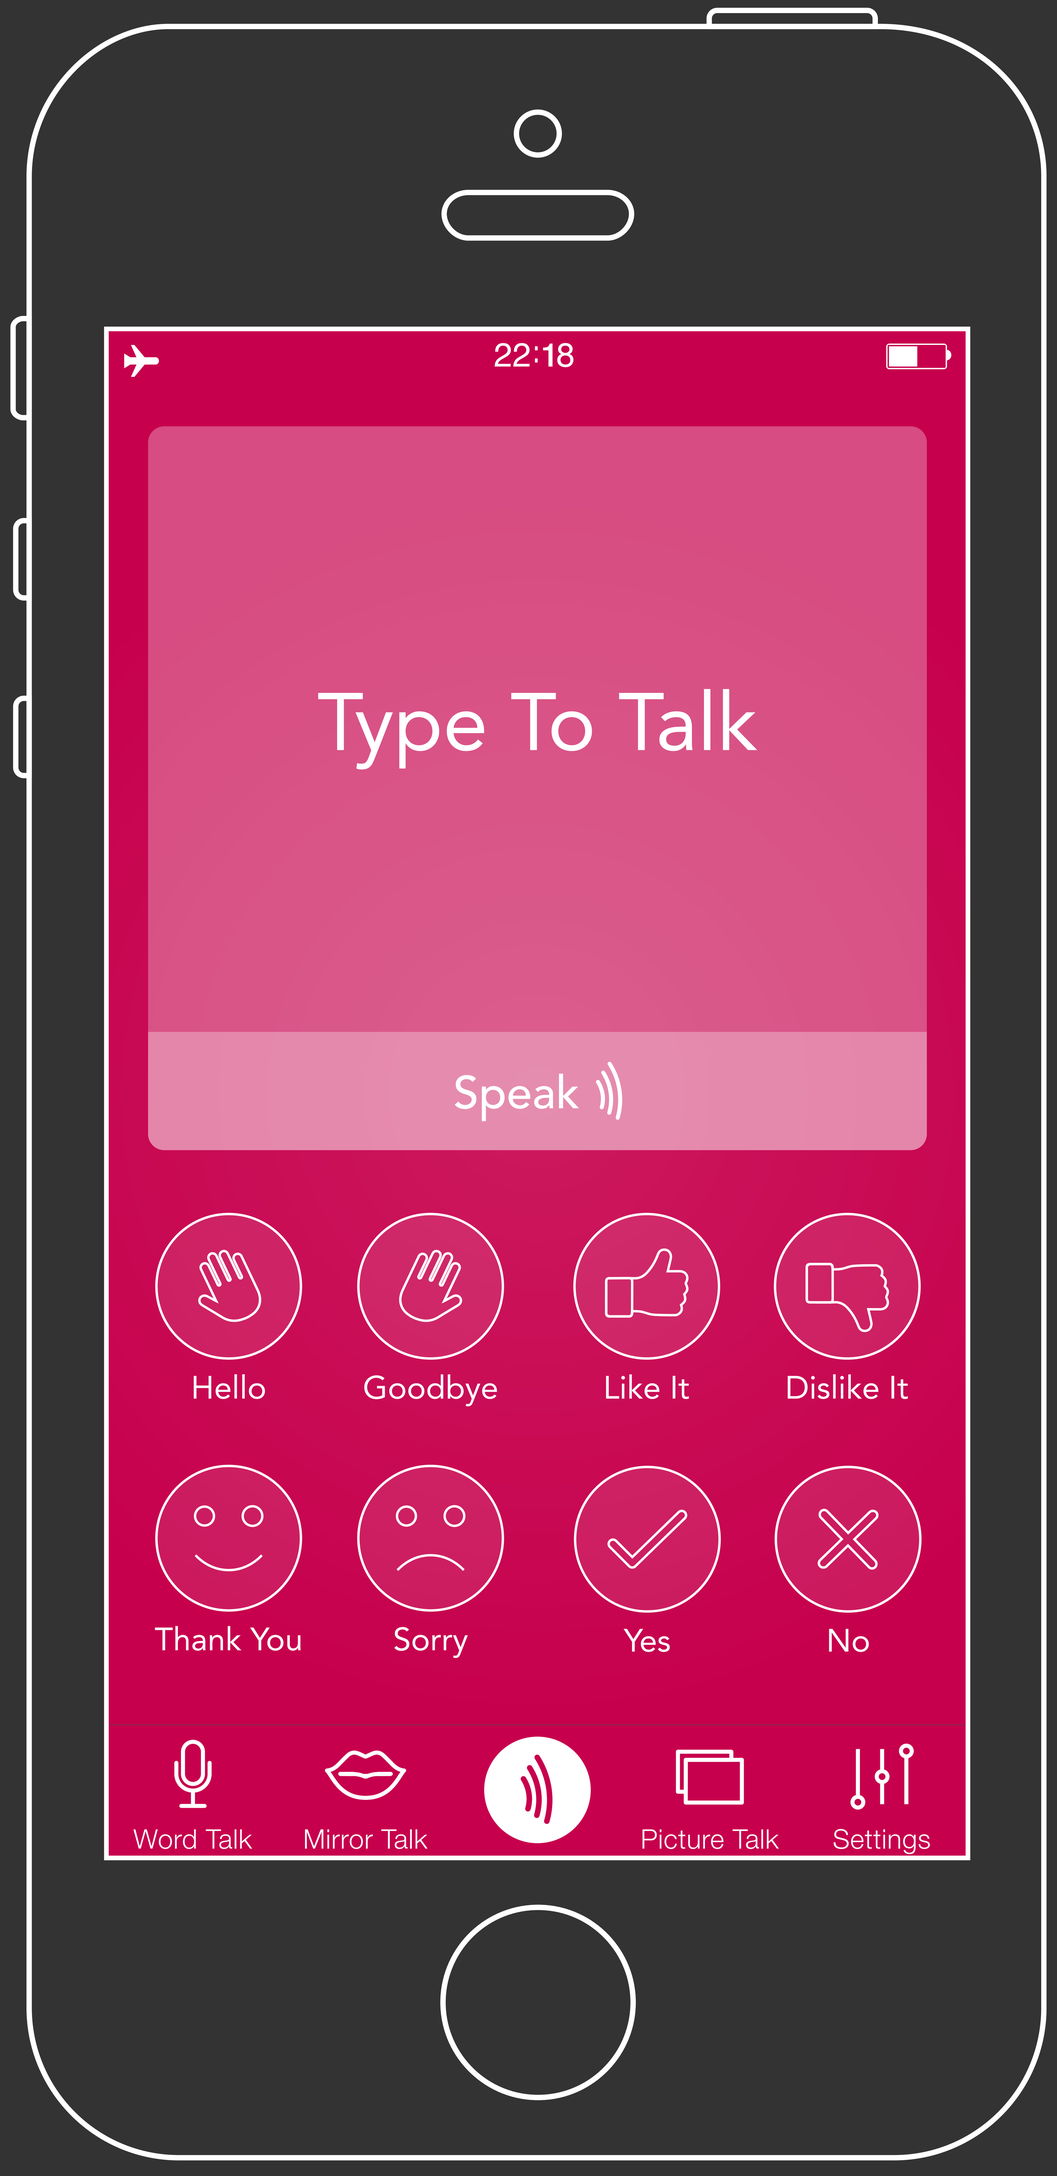
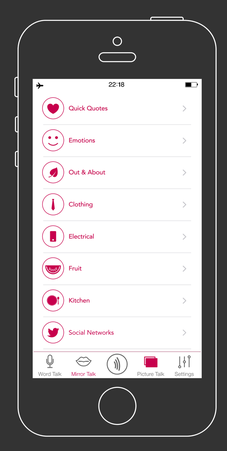
Speakability

Get Your Voice Back



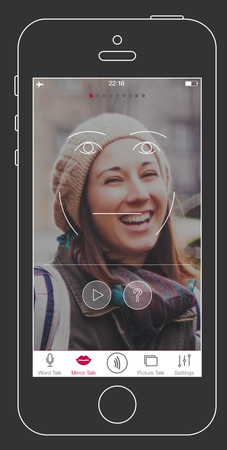
Type To Talk

Instantly convert written words into spoken words.



Picture Talk

Over 60 tapable icons that speak their subject. Helps users with self expression and daily activities.

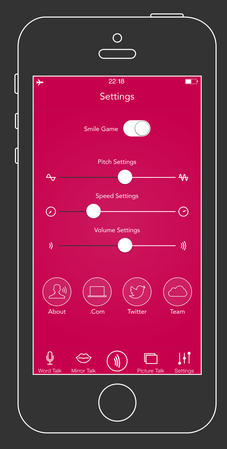


Mirror Talk

9 Speech therapy/facial muscle exercises that are sure to help you get your voice back.

Word Talk

Practise the pronunciations of words with a volume indicator bar to help you standardise your speaking volume.



Settings

Change the pitch, speed and volume of the speech spoken by Speakability to suit your needs.

Speakability is a innovative application that helps individuals express their feelings, thoughts, actions and needs.
Designed for anyone with communication impeding disabilities, such as autism, stroke and traumatic brain injury, as well as those that want to bridge the communication gap with them. It delivers quick, easy communication anywhere.
Best of all it is FREE on iPhone, and soon, iPad too.
